

The Stoneline Experience.

Stoneline is a leading supplier, fabricator, and installer of premium Grade A natural stone and bespoke terrazzo. Founded in Istanbul in 1997 with the vision of sourcing the finest materials in the world, the company has since established itself as a trusted partner for luxury residential and commercial projects on a global scale.

Stoneline sources, quarries, and delivers the highest-quality marble, granite, onyx, and other natural stones for super-prime projects worldwide. With a stockholding of over 10,000 slabs - featuring globally sourced materials, a selection of exclusive stones, and production from two of its own quarries - Stoneline also maintains strategic partnerships with renowned Italian wholesalers, including Antolini.

With its stockyard and state-of-the-art fabrication centre based in Istanbul, Stoneline also has its European flagship experience in central London, serving as a hub for its UK and international projects team.

Key Differentiators

Real-time cut drawings created by an in house team of architects, overlaid on chosen slabs for client feedback and visualisation.

Expert fabrication using a hybrid production of machine and hand finishing, allowing for Stoneline to have an almost limitless capability in surface finish and application.

ISO-certified for quality (ISO9001:2015), environment (ISO14001:2015), and health & safety (ISO45001:2018).

RAMS (Risk Assessment and Method Statement) provided for all installation projects.

Team & Capabilities

Our UK-based team of seven specialists in sales, marketing, and project management leads international projects, ensuring a seamless client experience from concept to completion.

Supported by more than 140 highly experienced professionals in Türkiye, operating across our stockyards, procurement operations, and advanced fabrication centres.

Stoneline offers an immersive slab showroom in the heart of Istanbul, showcasing over 250 curated materials, alongside a creative experience centre in central London designed to support architects, designers, and contractors throughout the specification process.

With direct access to our own and global quarries, we are uniquely positioned to fulfil large-volume and bespoke stone requests with consistency and control.

Every in-stock slab is individually scanned using the latest high-resolution imaging technology, allowing for precise selection and approval.

Comprehensive technical data sheets are provided for every stone, complemented by expert technical consultations.

Samples can be produced and delivered worldwide in any required surface finish, supporting confident decision-making at every stage.
